

ENVIRONMENTAL SOCIAL GOVERNANCE SERVICES

Environmental Social Governance (ESG) provides a framework that evaluates companies based on their environmental, social and governance awareness and compliance. By incorporating ESG in business strategies, companies can potentially increase shareholder value while still contributing to the sustainable development of the societies in which they operate.

How Does GeoQuest's ESG Approach Benefit Your Organisation?

Our ESG service allows your organization to potentially enhance its financial and operational performance whilst making positive contributions to the environments in which it operates by:

- Expanding into new markets and forming relationships with new customers and suppliers as a result of focusing on more environmentally and socially sustainable opportunities
- Encouraging ethical business practices
- Improving regulatory compliance
- Improving employee motivation, and increase productivity and satisfaction

Environmental

Social

Governance
